

Abrasive Blast & Paint Facility

WeamcoMetric now has the capability to complete the blast & paint requirements of our many products in house with our new on site, state of the art blast & paint facility. This gives us complete control of the manufacturing process resulting in improved quality and scheduling. We are also glad to announce that we are making this service available to anyone with industrial blast and paint requirements.

At this time our capabilities include the following features:

- Abrasive Blast with Steel Grit for surface preparation to SSPC specifications.
- Paints/Coatings: Zincs, various Epoxies, Urethanes, Multi-coat systems, etc..
- We also have the capability to do internal blasting and painting of pipe, vessels, etc., 8" diameter and larger.
- The maximum part size for our system is 10' wide x 8' high x 45' lg. and a weight of 10,000 lbs.

Our system is ideal for just about anything that falls within our size & weight requirements, such as Structural Steel & various fabricated items, Vessels, Tanks, Headers, Pumps, Valves, Trailers, etc..
